Title

VEHICLE DETECTOR WITH ENVIRONMENTAL

ADAPTATION

AMENDMENT

Hon. Commissioner of Patents and Trademarks Washington, D.C. 20231

Dear Sir:

In response to the Office Action mailed October 18, 1993, please amend the above-identified application for patent as follows:

IN THE CLAIMS

(Thrice Amended) In a vehicle detector in which vehicles are detected by an inductive sensor forming a part of an oscillator, and a change in the period of an oscillator signal is indicative of the presence of a vehicle in a detection area associated with the inductive sensor, a method comprising the steps of:

monitoring the [said] oscillator signal period to produce a corresponding measurement value;

detecting entry of a vehicle into the [a] detection area and detecting exit of the [a said] vehicle from the [said] detection area [associated with the inductive sensor,] based upon changes in the measurement value with respect to a reference value;

said vehicle will have sufficiently traveled after exiting the detection area so as to have substantially no influence on the period of the oscillator signal by

determining the speed of the [a said] vehicle; [and
